*Prof. Roel Verheul & Dr. Helene Andrea*

Some of these tools have completed the process of Italian validation, whilst others are still in the completion phase.

The Psyche-dendron association is happy to welcome any private and/or public person interested in serious scientific collaboration linked either to the process of validation of the tools, or to research involving the implementation of scientific knowledge in the field of psychology, medicine and Forensic Area.

The management committee of the Psyche-dendron association will examine all proposals for collaboration, in order to decide whether they are compatible with the association's mission and the timing, procedures and resources necessary to reach objectives in line with their own standards and mutually satisfactory to both the association and the potential partners.

All collaboration will be subject to formal agreements and in the case of one or more of the tools being used for a research project the Psyche-dendron association will inform the Authors, as suggested by a gentlemen's agreement between colleagues and indicated in the guidelines of the International Test Commission (ITC).
